## 26596 - Cyber Security L3 Firewall

**Location:** Mons Belgium.

**Period:** 395 ( start on 19 Oct. 2026)

**Deadline:** 18 Sep. 2026

**Duties/Roles:**

1. Build, implement, maintain, and support Next Generation Firewalls (System Administration);

2. Configure, maintain and review security policies and additional Next Generation Firewall capabilities (System Configuration);

Essential functions include, but are not limited to:

a. Central administration and configuration of Firewalls to ensure continuing functionality and availability;

b. Firewall policy/ruleset implementation and verification;

c. Provide technical support in troubleshooting infrastructure and operational issues and collaborating with other teams for asuccessful resolution;

d. Collaborate with the Infrastructure Management and other Cyber Security teams;

e. Provide assistance to Incident Handlers to identify and remediate security incidents;

f. Review security documentation and provide technical advice, when requested;

g. Perform other duties as may be required.

**Skills, Knowledge, Experience Required:**

- At least 3 years practical experience in cyber security or related field;

- Extensive knowledge and experience (min 3 years) in the following areas:

Palo Alto Networks Firewalls and Palo Alto Networks Panorama for Enterprise level deployments;

- Firewall installation and management of other vendors;

- Scripting (Bash, Python, Ansible);

- Experience with network protocols and traffic analysis;

- Ability to troubleshoot complex network security issues;

- LAN/WAN networking including protocol network architecture, and the vulnerabilities of modern operating systems and applications;

- TCP/IP protocols and services;

- Knowledge of *nix-based Operating Systems;

- Strong stakeholder management skills – can demonstrate evidence of developing and maintaining strong and effective relationships with internal stakeholders at all levels in an organization;

- Flexible and adaptable; able to work in ambiguous situations;

- Excellent communication abilities, both written and verbal, with the ability to clearly and successfully articulate complex issues to a variety of audiences and teams;

Training/certifications:

- Relevant certifications in cyber security, such as Certified Information Security Manager (CISM), Certified Information Systems Security Professional (CISSP) or GIAC Security.

*Desirable:*

- Administration of *nix-based Operating Systems;

- Experience in working for or supporting a military or governmental organization;

- Understanding of Information Security Practices relating to the Confidentiality, Integrity and Availability of information (CIA triad.).

Education:

- A minimum requirement of a Bachelor's degree at a nationally recognised/certified University in a related discipline and 3 years post-related experience;

- Or exceptionally, the lack of a university degree may be compensated by the demonstration of a candidate's particular abilities or experience that is/are of interest to NCIA, that is, at least 10 years extensive and progressive expertise in duties related to those in this Statement of Work.;

**Required Level of Security Clearance:**

NATO SECRET.
